

# Joseph Reyes

## About Me

---

I am a versatile programmer with a strong foundation in both front-end and back-end development. Studied software development in university and found interest in web development during my own time outside of school. Skilled in crafting engaging user experiences through intuitive front-end interfaces using HTML, CSS, and JavaScript frameworks such as React and Angular. Collaborative and proactive team player with a track record of successfully delivering projects on time and exceeding client expectations. I enjoy finding new trends so I am continuously expanding knowledge in emerging web technologies to stay ahead of industry trends. Passionate about combining creativity and technical expertise to develop innovative solutions that drive user engagement and business growth.

## Education

---

### Bachelor of Science, Computer Science.

September 2019 – June 2023

DePaul University – Chicago, IL

*Courses:* Data Structures & Algorithms, OOP, Web Applications, Web Development I and II, Database Systems

## Experience

---

### DePaul ID Lab

Oct 2022 – June 2023

#### Software Developer and Web Developer

- Collaborated with cross-functional teams to design, develop, and deploy dynamic websites and custom software solutions for client companies.
- Utilized HTML, CSS, JavaScript, and frameworks like Bootstrap to create visually appealing and interactive user interfaces.
- Contributed to the continuous improvement of development processes by suggesting and implementing best practices and innovative ideas.

### CinemUs (Movie Profile App) – [GitHub](#)

Sep 2022 – Nov 2022

#### Software Developer and Project Manager

- Led a team of fellow students in the development and management of a movie sharing profile app for a school project. Resulting in an A+ for the final grade.
- Developed the back-end functionalities utilizing **Python** and the **Flask** framework, integrating with a **PostgreSQL** database for efficient data storage and retrieval.
- Leveraged the **MovieDB API** to retrieve comprehensive movie information, including genres, directors, actors, and ratings, and seamlessly integrate it into the app's functionality.

### JThrifts (Ecommerce Website) – [GitHub](#)

Jan 2023 – Mar 2023

#### Web Developer

- Developed and launched a full-fledged e-commerce website for thrifted clothing, leveraging the power of **Node.js** and related frameworks.
- Utilized **MariaDB**, a high-performance open-source database, for efficient storage and management of product listings, user information, and transactional data.
- Designed and implemented a responsive and visually appealing front-end using HTML, CSS, and JavaScript, ensuring a seamless user experience across different devices and screen sizes.

**Programming Skills:** Java, Python, JavaScript/TypeScript, PL/SQL, SAS

**Other:** Git, ReactJS, Angular, NodeJS, HTML, CSS/Bootstrap, Tailwind, Framer Motion

**Interests:** Lifting, cooking, reading, podcasts, sports
